The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claims 1-52 are rejected under 35 U.S.C. 102(b) as being anticipated by EP '181.

EP '181 discloses processes for agglomerating particulate materials such as metallic ores. These processes include treating the particulate with water to moisten it, adding a polymeric binder (see page 3, lines 8-19) and a weak acid such as citric acid (see page 3, lines 20-36). Although the reference fails to explicitly recite rendering the particle surface negative, since the treatment processes are the same as those disclosed instantly, this negative surface charge is seen as inherently produced in the processes of the reference.
